**SHIPPING SEASON** opens about March 20 to April 1 in the Spring, and continues until May 20 to June 1, and opens about October 1 in the Fall, and continues until the ground freezes. Shipping for summer planting of Evergreens opens about August 15th, Pot-grown plants can be shipped and planted at all times.

**ORDERS.**—Write plainly and give **explicit directions** as to address and mode of shipment; otherwise we will forward **according to our best judgment**. All goods travel at purchaser's risk. **We assume no responsibility for the goods after delivery to the forwarding companies.**

When losses occur by delays in delivery, claims should be made **at once** on the forwarding companies.

**CLAIMS**, to receive consideration, must be made **within ten (10) days of receipt of goods**.

While we exercise the greatest care to have all Trees, Shrubs and Plants genuine and reliable, and hold ourselves prepared to replace, on proper proof, all that prove untrue, **we do not give any warranty, expressed or implied**; and in case of an error on our part, it is mutually agreed between the purchaser and ourselves that we shall not at any time be held responsible for a greater amount than the original price of the goods.

**PACKING.**—We take great care in packing, using damp moss to protect roots. **Boxes and bales are charged for at cost.**

**RATES.**—The prices in this list supersede all previous rates, and apply to quantities specified, but two hundred and fifty (250) will be furnished at the thousand rate, twenty-five (25) at the one hundred rate, and five (5) at the ten rate.

**This Price List cancels all previous lists and prices are subject to change without notice.**

**TERMS, CASH WITH ORDERS**, except to such persons as satisfy us as to their responsibility. Bills are due when presented and interest will be charged at the rate of six per cent. on bills remaining unpaid December 1 in Fall and June 1 in Spring.

**A Certificate of Inspection** will accompany each shipment.

**Address all communications to office.**

## SPRING, 1922

---

Our Evergreens are in especially fine condition this year. Most of them have been transplanted recently and all of them are in excellent condition for August planting. We wish to call special attention to our small Evergreens suitable for hedges, group planting and window-boxes, and to our large specimens for immediate effects.

A cordial invitation is hereby extended to visit our nursery at any time for the purpose of plant study, or for inspection of saleable stock.

**Calluna vulgaris** Scotch Heather, and named varieties

Scotch Heather, the "Bonnie Purple Heather" of song and verse, is a lovely, low-growing evergreen shrub, 6 in. to 3 ft. in height, of the Heath Family, covered in midsummer with small, bell shaped purple flowers, borne on slender spikes. These flowers stay in good condition for some weeks, and if cut while fresh will hold their color and charm all winter. Honey bees, too, are attracted to Scotch Heather and make from it a honey that is considered very choice. This plant is widely known as invaluable for planting in full sun in sandy soil; it is also most attractive as an edging to beds of Rhododendrons, Laurel, etc., and in Rock Gardens. This little plant gives most satisfaction when planted from pots. Besides the common purple Heather there are many varieties which give variation in the height of plant, color of flowers, and season of bloom. Below we offer a list of varieties, all of which are pot grown, sturdy plants. 2½ in. pots

var. **alba** White Scotch Heather, early blooming, with light green foliage, white flowers, grows 12 to 15 inches. 2½ and 3 in. pots

var. **alba elata** Tall White Heather. Late blooming, very tall, straight growth. Foliage soft dark green, flowers white, grows 18 to 24 in. 2½ and 3 in. pots

var. **alba hammondii** Hammond's White Heather. Mid-season, tall upright growth, foliage rich deep green, flowers white, grows 18 to 24 in. high. 2½ and 3 in. pots

var. **alba minor** Small-leaved White Heather. Mid-season, tall bushy growth, 15-20 in. high, foliage very fine light green; flowers white. 3 in. pots

var. **alba pilosa** Late blooming, tall growth 18-20 in. high, foliage of soft grayish green, flowers white. 3 in. pots.

var. **alba rigida** Late, low rigid growth, foliage rich deep green, flowers white. 2½ and 3 in. pots

var. **alportii** Late blooming, tall straight growth to 24 in. foliage deep rich green, turning purple in autumn. Flowers rosy carmine. 2½ and 3 in. pots

NOTE: The **Cotoneasters** are among the most important groups of hardy plants which have recently been brought before the public. All of them have attractive foliage and conspicuous berries. Of those listed below *C. adpressa*, *horizontalis* and its variety *perpusilla*, and *C. microphylla* are of low-spreading growth, have small glossy, evergreen-like foliage and bright red berries which stay on the shrubs well into the winter. The plants of this group of *Cotoneaster* are particularly adaptable for use in rockery, on the edge of low shrub-beries or on slopes. *C. Dielsiana*, *divaricata* and *salicifolia floccosa* are of more shrub-like growth, with long graceful branches, glossy leaves and bright red berries. All of these plants are hardy and do well in any good well-drained garden soil, but require plenty of water during the first year after transplanting, and take hold much more satisfactorily when transplanted from pots than from the field.

This Honeysuckle, also, is evergreen. The growth of this shrub is somewhat stiff, and spreading, the foliage ½ to 1 inch long, rather box-like, and bright shining green. While still a small plant *L. pileata* is covered with small yellow

flowers which produce in early autumn beautiful transparent berries of clear light purple. Like *L. nitida* this shrub does not always survive the severe winters of this climate; but in southern New England and south and west it is one of the most useful and beautiful of the new shrubs. It will serve as a specimen shrub in the garden, a shrub for rock-gardens, or as a low, wide-spreading hedge.

This is one of the rarest and most beautiful of all Hawthorns. It has large white flowers in early spring. Even the young trees offered by us bear quantities of large round edible scarlet fruits in August and September, and, later, the substantial leaves turn a beautiful scarlet.
